

Science Working Group Project Update

Sept. 22-23, 2000

Scott Lambros
Project Manager

Scott.lambros@gsc.nasa.gov

Project Update

- **Project move to Flight Programs and Projects Directorate (code 400) on target for October, 2000.**
 - Receiving Review being scheduled.
- **Project Manager assigned.**
 - Scott Lambros
- **Deputy Project Manager assigned.**
 - Richard Ho
- **Science Support Center (SSC) Manager assigned.**
 - Jay Norris

Project Update

(continued)

- **Issue:**
 - Re-entry analysis and NASA AA comments indicate need for propulsion system for controlled re-entry. (Re-entry analysis is being critically reviewed.)
 - This is a change in baseline and causes an increase in mass.
- **Resolution: Trades being studied:**
 - Verifying mass estimates with a propulsion system.
 - Requesting a larger launch vehicle.
 - Investigating Shuttle options.

Project Update

(continued)

- **Configuration Management:**
 - CM plan being put in place in Project.
 - All project documents will be under configuration control, once baselined:
 - SRD at this meeting.
 - Several to follow directly after SRR (eg., Mission System Spec, Interface Requirements Document, etc.)
 - SWG conduit to the Configuration Control Board is the Project Scientist, Jonathan Ormes.
 - SWG will review/comment on all proposed changes to the SRD and other documents as appropriate.
- **Level 1 Requirements are drafted and will be under NASA HQ control.**
